SEIZE THE OPPORTUNITY TO **RETHINK THE BUSINESS**

In recent years, cost pressure has been very tough, particularly for IT. This has forced many organisations to postpone and sometimes even abandon projects. The result: falling behind in technology! SAP has used this period to lay the foundation of a (r)evolution by developing its SAP HANA in-memory technology and its new S4/HANA integrated business management platform, which eventually will replace all existing SAP systems.

SAP HANA is more than a new technology; it allows processing information in a totally new way, 10,000 times faster than before! This new paradigm generates a wealth of opportunities for companies: they will be able to work in real time, integrate mobile applications into their processes, be connected to social media, and more. This is leading to an unprecedented cultural change as well as to a need to review the processes of the organisation. An open door to rethink the business.

A REAL LEVER FOR VALUE CREATION

A PROFITABLE BUSINESS CASE

Even if for some the necessary investment to migrate to SAP HANA can be significant, its effects on the IT budget will be key in building the business case. The fact that BI is directly integrated into the ERP-suite helps avoid licencing costs. The reconsolidation of the SAP systems allows the streamlining of both the underlying infrastructure and the applications, and the optimisation of the maintenance costs.

TOWARDS THE AGILE, DATA-DRIVEN ENTERPRISE

SAP HANA stands for increased automation, higher speed and optimised data processing capacity (Big Data). All three elements lead to an acceleration of processes, especially those of accounting and logistics. This acceleration can also be found at other levels. When decision-making is based on reporting and real time data, the company can be more very fast in responding to events and even show pro-active. This inevitably improves its time-to-market, productivity, competitiveness and, thus, increase its' revenues.

OUR **OFFER**

SAP HANA IMPLEMENTATIONS AND MIGRATIONS

We are the sole Belgian business to be "SAP Certified in SAP HANA Operations Services" and we offer a full range of services in that context.

Business & Technical Consulting

In order to support the business side of your company, we carry out impact and feasibility studies.

We also offer advice on the choice of the infrastructure and the hosting of the solution: on premise, or in a private, public, or hybrid cloud. An example of a hybrid cloud set up: the production being located in a private cloud, the demo/test/lab environment in the Azure or Amazon public cloud and everything interconnected and managed by Trasys International, the manager of your SAP solutions.

Technical Transformation

We offer implementation, migration, and technical upgrade services to SAP HANA from all types of databases.

Business Transformation

Once SAP HANA is implemented, we help our customers rethink their business processes, optimise their configuration, and educate the users (training). This business transformation is also the ideal opportunity to technically implement new modules to support these new processes.

SAP HOSTING & SAP BC

PaaS for SAP

We host and manage all layers of your SAP systems (DC, Network, SAN, Unix-Like, Windows, DB, SAP BC, etc.) from our geo-resilient data centers located in Belgium. Our "SAP Certified Hosting Services" certification is unique in Belgium and guarantees that you benefit from an advanced, secure, and efficient infrastructure.

SAP BC

We offer SAP BC consulting services for implementation and transformation projects. Our certified and experienced consultants also perform audits and are able to train your staff.

Licence Sales, Support & Maintenance

We support our customers throughout the lifecycle of their SAP systems. Our "Certified SAP Partner Center of Expertise" certification allows us to resell licences and offers you the certainty of benefiting from high-level support services: L1, L2, and L3, Helpdesk, 24/7 Functional and Technical support, Extended Business Hours or Business Hours support. We can assist you in the run-up phase but also offer the advice for your future choices: release, upgrade, migrations, etc.

WHY CHOOSE TRASYS INTERNATIONAL AS YOUR **SAP-PARTNER**?

One stop shop and expertise

At NRB, you benefit from expertise in the professional (Health Care, Public Utilities, Public Sector, Industrial, etc.), operational (Finance, Logistics, HR, etc.) and technical domains. In addition, we master the specific legal environment in Belgium..

Experience, certifications, and a special relationship with SAP

We are in constant contact with the publisher, and we have used unique and important certifications for many years. We have also been recognised by SAP on several occasions in the recent past (e.g., SAP Innovation Award 2012 and 2015, Best MCaaS Partner 2013).

SAP® Certified
in Hosting Services

SAP® Certified
in SAP HANA® Operations Services

SAP® Certified
Partner Center of Expertise

Infrastructure and advanced data centers

Our investment capabilities and our partnerships with major hardware vendors (IBM, HP, VCE, etc.) allow you to benefit from the most efficient technical solution to host your SAP systems.
